## ● PROJECTS

---

08/03/2020 - CURRENT

### **Master thesis in educational technologies**

---

I worked on a Master thesis, born from the cooperation between the University of Turin, Italy and the University of Gent, Belgium.

The aim of my research was divided in two purposes: the first one intended to evaluate the impact of the Covid-19 lockdown on primary schools' teachers' digital competence, by the administration of surveys and interviews, comparing the Italian context with the Belgian one.

The second part focused on evaluating the impact of the Covid-19 pandemic on the spatial-temporal expertise of 7/8 year old Italian children, from a specific Italian primary school. These data have been detected by comparing the results of the TRC, an American standardized test created to evaluate spatial-temporal competences on children of the first years of primary school, submitted to students of the same primary school, before and after the school closure, due to the pandemic.
